Summary

B.Tech (Artificial Intelligence) student at VCE Rohtak with knowledge of Python programming and a strong interest in Machine Learning. Enthusiastic learner with problem-solving skills and a passion for developing AI-based solutions

Education

Maharshi Dayanand University	Rohtak
Vaish College Of Engineering (VCE)	
B.Tech in Artificial Intelligence	Expected
Graduation: 2028	

- Current Semester: 4th | CGPA: 8.23
- Relevant Coursework: Object Oriented Programming, Database Management System, Machine Learning, Artificial Intelligence

Technical Skills

Programming Languages: Python, SQL
Libraries: NumPy, Pandas, Matplotlib, scikitlearn, TensorFlow, Streamlit
Technologies: Machine Learning , Data Science
Tools: GoogleColab, GitHub, VSCode, Canva, MSWord, MSExcel

Projects

Student Marks Prediction:

<https://github.com/nancysaini00028-droid/Students-marks-predection>

Python, Pandas, NumPy, Scikit-learn, XGBoost

- Developed a machine learning model to predict student marks using regression techniques.
- Performed data preprocessing and EDA using Pandas and NumPy.
- Compared Linear Regression and XGBoost models to improve prediction accuracy.

- Developed a web application using Streamlit to predict students' performance through UI

Iris Flower Classification:

<https://github.com/nancysaini00028-droid/DecodeLabs-Internship/blob/main/iris.ipynb>

Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Developed a machine learning model to classify Iris flowers into Setosa, Versicolor, and Virginica based on sepal and petal measurements.
- Performed data preprocessing, exploratory data analysis (EDA), and feature visualization using Pandas, NumPy, Matplotlib, and Seaborn.
- Trained and compared multiple classification algorithms including Logistic Regression, KNN
